Best Credit Data now Distributing Corporate Bond Pricing and Analytics

BOSTON, Mass., FEB. 17, 2016 – [Best Credit Data \(BCD\)](#), a provider of bond pricing data and analytics, has completed and deployed its new corporate bond pricing and analytics database product. BCD Corporate Bond Pricing provides daily evaluated pricing and analytics for over 30,000 U.S. corporate bonds with eight years of end-of-day history.

BCD's Corporate Bond Pricing product is available via FTP feed today, and will soon be available via other third party partners as well. Clients can subscribe to an end of day pricing service or a one-time historical data download..

"As one of the newest upstarts in evaluated pricing, we must compete on velocity, quality and scope of our data set," said Pierre Robert, CEO of Best Credit Data. "Cloud technology made the previously unfathomable possible with our muni bond product, and now it's doubled-down in corporate bonds."

Corporate Bond pricing will be made available directly to clients, or through BCD's number of partners. The data set encompasses price, yield, spread, multiple duration calculations, convexity and OAS.

"Clients and prospects have been asking for alternatives in corporate bond evaluated pricing," said Robert. "Our investment in this product is the next step to rounding out unrivaled coverage of all asset classes."

Best Credit Data expects to close its next round of funding in Q1 2016.

About Best Credit Data Inc.

Best Credit Data is a Boston based provider of US bond pricing and analytics. By using observation driven methodology and big data cloud computing technology, BCD is changing the bond pricing and analytics world by providing cost effect alternatives to pricing bonds.
